

## Explore Pressbooks

### User-friendly digital publishing, optimized for learning

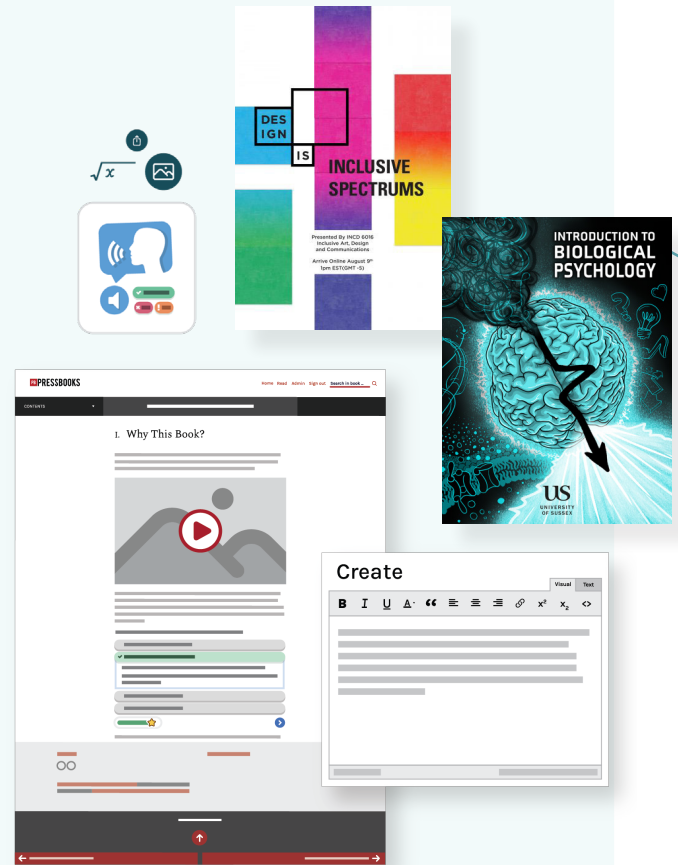

Pressbooks is a versatile digital publishing platform used by 500+ organizations and educational communities as essential infrastructure for creating and sharing knowledge.

Pressbooks helps users make beautiful, easy-to-navigate digital books with multiple download formats. With Pressbooks, it is simple to develop, adapt, and share engaging, interactive materials that enhance learning, advance scholarship, and support organizational communications.

### The platform at the heart of Pressbooks

The user-friendly Pressbooks publishing platform includes built-in features that support best practices for creating, adapting, and sharing highly effective educational materials:

- **Accessibility and inclusion:** Pressbooks platform is accessible by design, and encourages all users to create and publish accessible content by default
- **Collaboration:** Pressbooks allows multiple users, including students, to collaborate in creating, maintaining, and updating publications
- **Engagement and interactivity:** Pressbooks supports pedagogically effective user experiences including multimedia, assessments, interactive activities, and social annotation
- **Flexible distribution and sharing:** Pressbooks supports creators' choice on how to make content available, with a range of copyright licenses, online and offline distribution formats
- **LTI 1.3 integration:** Pressbooks supports interoperable standards that allow users to seamlessly interact with learning materials inside the learning management system (LMS)

### Common projects powered by Pressbooks

- Original open educational resources (OER)
- Original copyrighted materials
- Interactive digital books
- OER discovery, adaptation and remix
- No- or low-cost curriculum strategy
- Academic press and scholarly publishing
- Administrative publishing: policies, plans, training, reports, etc.

## Pressbooks Enterprise Networks

A Pressbooks Enterprise Network is a hassle-free choice for organizations that want to empower their communities with digital publishing. This software-as-a-service (SaaS) solution includes a variety of value-adding features designed to power digital publishing programs of all sizes and maturity levels:

- Platform setup
- Custom network branding
- Dedicated catalog to showcase work
- 15+ well-designed book themes
- Single sign-on ease-of-use
- Updates and maintenance
- Network and book analytics
- Training and premium support for platform administrators
- And more!

## Pressbooks Shared Networks

Designed specifically for multi-institution systems and consortia, Shared Networks provide Pressbooks platform access to organizations with multiple affiliated members. Shared networks include all the benefits of Enterprise Networks, along with configuration and support options designed to meet the needs of multi-institution consortia. These networks also offer flexibility around contracting and usage to better align with complex organizational needs.

## Pressbooks Results

This add-on solution is an assessment helper that encourages greater student engagement with Pressbooks learning materials. When Pressbooks titles include gradable interactive learning activities, this solution can pass student grades from these activities directly into the LMS gradebook. It also presents students and instructors with detailed learning data, a deeper understanding of learning progress, and actionable insights to better support student success.

## Pressbooks Individual Subscriptions

Pressbooks offers self-service subscriptions that empower individual authors or small teams to collaborate on the creation, adaptation, and sharing of digital books.

## For Everyone: Pressbooks Directory

Free for everyone is [Pressbooks Directory](#), a searchable website that lists 5,000+ open access books published by 160+ individual and shared networks via Pressbooks' platform. This popular resource helps creators share their work with broader audiences, and it helps anyone discover books of interest. Pressbooks users can easily copy openly-licensed work in the Directory, adapt and remix it to create a new project that fits their specific context and needs.
