

PB PRESSBOOKS **EDU**

An Online Content & Courseware Development Platform

By supporting non-disposable, open, accessible, interactive, and customizable content and courseware, Pressbooks supports a resilient distance and online learning ecosystem.

Pressbooks consists of three tools that support the discovery, development, and delivery of educational material and courseware:

- Pressbooks Directory
- Pressbooks Authoring & Editing Platform
- Pressbooks Results

Pressbooks Directory

Over the past decade, Pressbooks has supported the creation of thousands of OER. Now, all public books created with Pressbooks can be made available and discoverable in the Pressbooks Directory. Anyone can access OER on the web and download it in multiple formats. Pressbooks users can adapt texts in the Authoring & Editing Platform

Pressbooks Authoring & Editing Platform

Using the Pressbooks Authoring & Editing Platform, faculty can create open textbooks from scratch, adapt existing OER for their classrooms, and enrich content with accessible math notation, videos, audio recordings, web annotation, and interactive elements like quizzes and other forms of assessment.

Pressbooks Results for LMS

Pressbooks does more than support the creation of OER. With Pressbooks Results, course material and student outcomes can be easily integrated into an LMS gradebook. Pressbooks has achieved IMS Global certification for the LTI 1.3 and LTI Assignment & Grade Service.
